And I should also make clear that I am not saying become a competitive programmer or a Leetcode expert. For example, there isn't much value in looking at dynamic programming style problems unless you are interviewing at a top company. But spending 30min to an hour a day on easy to medium level questions will definitely sharpen your reasoning about algorithms and data structures. And like I ...

But if you have a lot of disposable income, trading that money for time might be something that you want to do. Still, with that said, I don't feel like I have a good idea of how much I should value my own time, as a programmer in a normal programming job. I could see anywhere from \$10/hr to \$100/hr, and perhaps even outside of that range.

However, things changed when I finished high school. Programming isn't the same as the subjects taught in a high school class. The only way to learn is by making mistakes. As someone who wasn't used to this, I was surprised at how long it took me to learn how to code. "I'm making way too many mistakes." I thought. Suddenly, I wasn't the best at what I did anymore. I struggled at ...

If you're not a programmer this can be a complex one, but it's very important. The way Apple and Google have designed their operating systems and the way they allow apps to run is very different and leads to very different security situations. These situations should absolutely be considered if you're choosing between an iPhone or Android.
