Gypsy Hill Park History

Gypsy Hill Park began as the site of Staunton's water supply in the mid 1800's Several springs were located in this area and water from the springs was dispensed to the city via the pumping plant nearby In 1876, the city purchased 30 acres of land around the springs in order to protect the town's water supply

Update on Gypsy Moth impacts to Watershed Forests

of gypsy moths remained quite high over this entire region, and I fear we face more extensive defoliation next year This was a big surprise to me because I expected another massive epizootic of Entomophagaimaigathat occurred last year (2017) and is largely responsible for the decline in defoliation we observed this year compared to 2017
