Gas-powered golf carts use a gas engine similar to that of a car but on a much smaller scale. Golf carts average a horsepower of 11 and max out at about 15 miles per hour. Some golf carts can make it to 25 miles per hour if they're used on a and not on a golf course. They usually come with low-emission engines with a single cylinder. They also only have a 1-quart oil capacity with splash ...

[Gas golf cart engines for sale from Balls Out Motors](#)

The most likely cause of gas spitting from the golf cart valve is due to the needle valve in the carburetor of your cart not working properly. It's not stopping fuel that flows into the carburetor right. This causes the fuel to continue to flow and eventually wind up in the engine crankcase. Your oil will probably be more than full because of this: the oil has been diluted with fuel! Here ...
